Ryan Wilson

Infrastructure Security Engineer | Security Analyst
Des Moines, IA (Open to Remote)
ryanwilson.io | github.com/rywils | linkedin.com/in/rywils

SUMMARY

Security-focused engineer with 8+ years of experience in networking, systems administration, and infrastructure operations. Background in enterprise networking, Linux systems, and cloud environments across AWS and Azure. Hands-on experience with security technologies including Fortinet NGFW, Cisco Firepower, CrowdStrike Falcon, and Snort. Currently pursuing a B.S. in Cybersecurity and Information Assurance while building Bitprobe, a vulnerability scanning platform for web, network, and TLS analysis. Currently focused on transitioning into security engineering, vulnerability research, and infrastructure security.

EDUCATION

Western Governors University
B.S. Cybersecurity and Information Assurance
In Progress — Started January 2026

Des Moines Area Community College
A.A.S. Information Technology — Network Administration
Graduated May 2016

TECHNICAL SKILLS

Security: Vulnerability assessment, threat detection, incident response, network segmentation, Fortinet NGFW, Cisco Firepower, Snort, CrowdStrike Falcon, Splunk, Wireshark, Nmap, Burp Suite

Networking: TCP/IP, VLANs, VPNs, routing & switching, DNS, DHCP, Cisco, Juniper, Aruba, pfSense, Riverbed

Systems: Linux administration, Windows Server, Active Directory, system hardening, VMware, Proxmox, Hyper-V, Ubuntu, RHEL, Debian, Kali, AlmaLinux, SELinux

Cloud / Infrastructure: AWS, Azure, GCP, Terraform, Ansible, Docker, Kubernetes, VPC networking, WAF, CloudFront/CDN, CloudWatch

Development: JavaScript/TypeScript, Python, Go, C, C#, PHP, Node.js, React, REST APIs, GraphQL, Supabase, PostgreSQL, MySQL, MariaDB

SECURITY PROJECTS

Bitprobe — Vulnerability Scanning Platform
Personal Project | 2025 – Present
Tech: Python, Go, Typescript, Node.js

- Building a modular vulnerability scanner for web applications, network services, and TLS configurations.
- Developing scanning modules to detect exposed services, TLS misconfigurations, and known CVE vulnerabilities.
- Implementing service discovery and attack surface enumeration.
- Building reporting output for vulnerability tracking and remediation.
- Designed for security research, automated analysis, and penetration testing workflows.

PROFESSIONAL EXPERIENCE

Freelance Developer — ryanwilson.io
Nov 2024 – Present

- Develop web applications using React and Next.js, along with WordPress sites for small business clients.
- Project specific, full-stack applications using Next.js, Vue/Nuxt, SvelteKit, and Laravel.
- Build backend APIs and services using Node.js, Express, GraphQL, tRPC, and Supabase.
- Deploy applications across AWS, Vercel, Netlify, Linode, and DigitalOcean.
- Implement CI/CD pipelines, CDN distribution, and Redis caching with Upstash.
- Design application data layers using PostgreSQL, SQLite, MongoDB, and MariaDB.
- Manage full project lifecycle including client onboarding, architecture, deployment, and support.

Systems Engineer — DH Pace
Jul 2023 – Aug 2024

- Administered VMware vSphere infrastructure (vCenter, ESXi) across hybrid environments.
- Managed AWS workloads and Cisco Meraki cloud-managed networking.
- Deployed and maintained Fortinet NGFW policies and site-to-site VPN infrastructure.
- Supported Cisco and Aruba networking equipment across enterprise locations.
- Implemented CrowdStrike Falcon endpoint protection across enterprise endpoints.

Freelance Consultant — RYIO Consulting
Mar 2022 – Jun 2023

- Provided IT consulting and infrastructure support for small and mid-sized businesses.
- Managed Windows Server and Linux environments including Active Directory and Group Policy.
- Supported AWS and Microsoft Azure infrastructure deployments.
- Performed infrastructure troubleshooting, system upgrades, and maintenance.
- Assisted clients with network configuration, system administration, and operational support.

Systems Administrator — BlueAlly
Oct 2019 – Dec 2021

- Managed Fortinet Security Fabric deployments, Cisco ASA, and Cisco Firepower firewalls.
- Implemented Riverbed SteelHead WAN optimization appliances.
- Deployed Talari SD-WAN solutions to improve connectivity across distributed sites.
- Administered Linux servers, including package management, services, and automation scripts.
- Maintained strict SLA requirements across managed enterprise environments.

Help Desk Specialist (Contract) — Casey's General Stores
Jul 2019 – Oct 2019

- Supported rollout of Casey's online ordering platform across retail locations.
- Assisted with incident triage, ticket resolution, and remote troubleshooting.
- Provided technical support for store systems and retail infrastructure.
- Worked with deployment teams during rollout of new ordering systems.

Datacenter Technician (Contract) — Microsoft
Nov 2017 – Dec 2018

- Diagnosed and triaged server and hardware failures across datacenter clusters.
- Performed Cisco Nexus switch configuration and network troubleshooting.
- Assisted with rack deployments and server cluster provisioning.
- Maintained compliance with strict Microsoft SLAs for outages and hardware failures.

CERTIFICATIONS

- ISC2 Certified in Cybersecurity (CC)
- Riverbed RCPE Associate (Expired)
- LogicMonitor Certified Professional (Expired)
- Fortinet NSE3 (Expired)
